

## QUICK START GUIDE FOR PIZZA OVEN

### Assembly

1. Fold the legs out

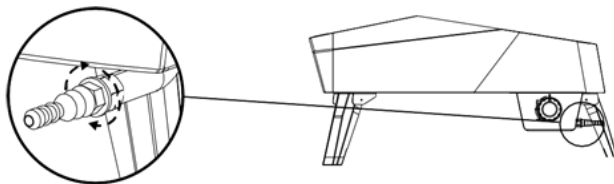

2. Insert the pizza stone

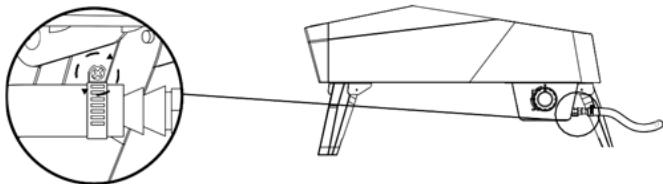

### Gas connection

1. Mount the connection to the oven

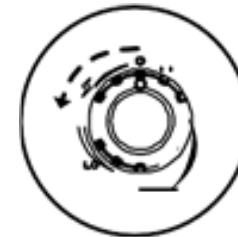

2. Put the hose onto the connection

### Ignition of burner

1. Make sure the control knob is in the OFF position and then turn the liquid propane cylinder valve by turning it counterclockwise.
2. Push in and slowly turn the knob counterclockwise until you hear a click and the burner lights up
3. If the burner does not light up, turn the knob to OFF, wait for 5 min and repeat the ignition

### Ignition with matches

1. If the burner does not light up after several attempts with the control knob, it can be lit with a match.
2. If an attempt has been made to ignite the burner with the control knob before, wait for five minutes until gas disappears.
3. Insert a match into the match holder, light the match and insert into the burner through the oven opening.
4. Push and turn the knob slowly to HI, the burner should then light up immediately.
5. If the burner does not light up within a few seconds, close the control, wait for 5 min and try again.
